WDFW Project WILD Correlations to Washington State Essential Academic Learning Requirements (EALR's)

ORGANIZED BY SUBJECT

The correlations for the Project WILD activities are summarized by subject. Use this matrix to find what activity addresses certain benchmarks you are targeting. The numbers in the subject sections of the matrix correspond to benchmark numbers in the Overview of the Essential Academic Learning Requirements provided by the Washington State Commission on Student Learning. For each activity a symbol indicates what subject area standard is addressed and in a few instances whether it provides background information, options or variations, extensions or evaluation that addresses the learning requirement.
